Art Unit: 1614

A PTO-1449 form is need for the IDS.

Restriction to one of the following invention is required under 35 U.S.C. 121

Group I: Claim 1-12 and 26-32 drawn to methods and composition for treating cancer with an enhanced combination of a phenyl-protein transferase inhibitor and an antineoplastic agent. If applicants elect this Groups, they are further required to elect a single enhanced combination of one phenyl-protein transferase inhibitor with one antineoplastic agent.

Group II: Claims 13-25 drawn to methods for treating cancer with an enhanced combination of a phenyl-protein transferase inhibitor and radiation thereby. If Applicants elect this Group, they are further required to elect a single enhanced combination of one phenyl-proteins transferase inhibitor with radiation therapy.

Applicants on page 17, line 1-4 state the "it is also anticipated that the instant composition will achieve a synergistic therapeutic effect or will exhibit unexpected therapeutic advantage over the effect of any of the component compounds if administered alone".

The several inventions above are independent and distinct, each from the other, as they have acquired a separate status in the art of treating cancer as a separate subject matter for inventive effect and require independent searches. It is noted that a reference to one enhanced combination of drugs would not be a reference to another enhanced combination of drugs under 35 U.S.C. 103. Further, the claims read on a multitude of enhanced combinations of drugs which would require many field of searches that would be an undue burden on the Examiner. Therefore, restriction for examination purposes is proper.

Applicants are required to make a provisional election even though this requirement is traversed.
